Membership Application Form

(revised 31/05/2007)

The Mobile Computer Users Group (MCUG) invites membership from individuals and organisations involved in the use, development, or delivery of mobile business data systems. End users are classed as full members, and are encouraged to participate in setting direction, whereas members from supplier organisations are classed as Associates and do not dictate activities. Since foundation membership rates have been substantially reduced for Users, and held constant for Associates. Since inception in 1996 the MCUG has been managed by OSYS technology limited acting as the Secretariat. From October 2000 the Steering Committee devolved all business matters back to the Secretariat, and they now function in a purely advisory role. MCUG uses Service Management Magazine to carry its monthly print newsletter.
